

Nathan Brodin

Tromsø, Norway · nathan@brodin.dev · brodin.dev · [LinkedIn](#) · [GitHub](#)

Technical Skills

Languages: TypeScript, JavaScript, Python, HTML, CSS

Frameworks & Libraries: React 19 (+ Compiler), TanStack (Router, Query, Table, Form), Next.js, Django REST Framework, Tailwind CSS, Base UI, shadcn/ui

Tools & Infrastructure: Docker, NGINX, PostgreSQL, Redis, Playwright, Storybook, GitHub Actions CI/CD, Vite, Keycloak

Practices: OpenAPI/REST API design, WebSocket integration, end-to-end type safety, RBAC, responsive & cross-browser development, i18n

Experience

Full Stack Engineer

Capia AS

Aug 2025 – Present

Tromsø, Norway

- Architected and shipped a production SaaS app from scratch: React 19 frontend, Django REST backend, Docker/NGINX on self-managed servers.
- Implemented end-to-end type safety across Python and TypeScript using OpenAPI schema generation (drf-spectacular) and auto-generated TanStack Query hooks (Orval).
- Designed the full UI with Tailwind CSS, Base UI, and shadcn/ui, with strong attention to design consistency.
- Built CI pipeline covering linting, schema validation, ~900 backend tests, and ~100 Playwright E2E tests. Runs under 7 min with caching and sharding.
- Implemented RBAC, WebSocket-based live notifications, Redis caching, and ClickHouse integration.
- Wrote full documentation, DX tooling, database seeding, and Makefile commands so the entire project sets up in minutes.

Frontend Engineer Intern

DNB

Feb 2025 – Jul 2025

Oslo, Norway

- Delivered 15+ major features across 3 frontend applications serving 100k+ users.
- Migrated a production application from Gatsby to Vite, cutting build times by 60%.
- Built a full Playwright E2E test suite (350+ tests across browsers) with CI running under 90 seconds.
- Six-month Master's thesis internship; graded 92/100.

Frontend Engineer Intern

DNB

Apr 2024 – Aug 2024

Oslo, Norway

- Built the frontend of a GenAI chatbot platform from blank repo to production with 92% test coverage.
- Established testing infrastructure with Storybook, documented architecture, and consistent styling standards.

Frontend Engineer Intern

DNB

Jul 2023 – Aug 2023

Oslo, Norway

- Shipped an internal admin panel from scratch: UI implementation from Figma designs, REST API integration, auth, and deployment.

Education

Master of Engineering, Software Engineering

ESIEA Graduate School of Engineering

2020 – 2025

France

Graduated 92/100. Coursework in algorithms, distributed systems, systems programming, application design.

Exchange semesters at Mid Sweden University (Sweden) and Centria University (Finland).

Selected Projects

Chat – AI-powered conversational portfolio built with React Server Components and the Vercel AI SDK.

Portfolio – React 19 + TanStack Start with static prerendering, JSON-LD structured data, sitemap generation, OG generation, and dependency pre-bundling.

Zed Vercel Theme – Top-15 most downloaded Zed editor theme with 52k+ downloads.
